

KEVIN TAVARES

<MyPortfolio/>

Software Engineer

PROFESSIONAL SUMMARY

Software Engineer specializing in Java Back-End, with over 3 years of experience in microservices, payment APIs, and financial integrations. I have worked on high-impact projects in the public and private sectors, applying Java 17, Spring Boot, Hibernate, messaging (RabbitMQ/Kafka), and relational databases (Oracle, PostgreSQL).

Experience in clean architecture (DDD, SOLID), CI/CD with Jenkins, Docker, and GitHub Actions, as well as cloud computing (AWS, Azure, Oracle Cloud). Certified by Oracle, Meta, and Microsoft

3Step Performance - Java Software Engineer

Jul/2025-Atual

- Back-end in Java 17+ (Spring Boot, Hibernate, REST APIs) with PostgreSQL.
- Messaging (RabbitMQ/Kafka) for notifications and asynchronous processing.
- CI/CD on AWS (CodePipeline, CodeBuild), integrations with S3, RDS, and SES/SNS.
- Microservices orchestrated with Kubernetes and Docker.
- Development of a management dashboard in Vue.js.

PREVIC - Java Back-End Developer

Mar 2023 - Mar 2024

- Microservices with Java 17+, Spring Boot, Hibernate, and Oracle.
- Modernization of government systems (CAND Project).
- Secure external integrations and standardization of REST APIs.
- Automated testing (JUnit, Mockito) and CI/CD with Docker and Jenkins.
- DDD-oriented modeling and application of SOLID.

ATP Tecnologia - Java Developer

Mar/2024 - Dez/2024

- Developed native Android applications using Kotlin and Java, integrating POS payment APIs (Vero, Mercado Livre), ensuring secure, real-time transactions.
- Performed deployment and publication of applications on proprietary devices, ensuring operation in high-availability environments.
- Created a responsive web widget in React.js hosted on AWS, using Amazon S3 (storage), API Gateway (secure API exposure), and EC2 (back-end execution).
- Configured deployment pipelines with AWS CodePipeline and CodeBuild, accelerating deliveries and standardizing environments.

- Back-end development with .NET 8 and SQL Server.
- Front-end creation with Vue.js + Quasar.
- Migration of legacy ASPX systems to modern .NET.
- Integrations with Azure and support for large-scale systems (347,000 beneficiaries).

Green Corporate – Desenvolvedor Java Júnior**Fev/2022 – Jan/2023**

- Supported the development of back-end functionalities with Java 11, Spring Boot, and JPA/Hibernate, always accompanied by more experienced developers.
- Contributed to integrations with external APIs and consumption of REST services, ensuring the reliability of communications between systems.
- Followed best practices of SOLID, Clean Code, and versioning with Git, evolving my technical foundation in Java back-end.

EDUCATION

Bachelor's in Computer Science

Ag 2025 - Ag 2029

CERTIFICAÇÕES

- Java Explore - Oracle
- Foundational C# - Microsoft / FreeCodeCamp
- Professional Front-End Developer - Meta
- React Native Expert - Meta
- Android Developer Professional Certificate - Meta

TECHNICAL SKILLS

- Back-End: Java (Spring Boot, Spring Data, Spring Security, JPA/Hibernate), .NET 8 (C#), Node.js
- Messaging & Integration: RabbitMQ, Kafka, REST APIs, financial APIs (POS Vero, Mercado Livre)
- Databases: Oracle, PostgreSQL, SQL Server
- DevOps & Cloud: Docker, Jenkins, GitHub Actions, Azure, AWS (basic), Oracle Cloud
- Architecture: Microservices, DDD, SOLID, Clean Architecture
- Front-End: React.js, Vue.js (Quasar), AngularJS
- Mobile: Kotlin, Java (Android), React Native
